How this is worked out

- Week move = last close on or before Fri 25 Sep against the last close before Mon 21 Sep. Prices are not adjusted for dividends.
- Medians are used for sectors and the four-week line, so one extreme stock does not swing the whole group. On days a thinly traded share did not trade, its previous close is carried forward.
- 52-week high or low: a close this week beyond every close of the previous ~245 trading days.
